

Liam Bautista

Age: 22

Gender: Male

Location: Trece Martires City

Occupation: Part-time Content Creator / College Student | Tech Proficiency: High

Background

Goals

Manage a personal library of favourites and custom playlists, instantly jump back to recently played tracks, clearly see track details, artist name and genre, control playback easily without disrupting workflow

Needs

Side by side view of all music categories, shuffle repeat controls, progress bar with time stamp, favourite heart button, smooth selection between panels

Pain Points

Scattered lists that require scrolling too much, no visual highlight for selected song, missing clear Now Playing focus, playback controls too small or hard to reach

Listening Habits

4-7 hours daily uses desktop player as main listening tool, organises playlists for different moods activities, frequently switches between favourites, playlists and history

Preferences

Dark mode with high contrast, clear separation of sections as shown, central large album art display, visual feedback when selecting a song; simple and consistent colour scheme

Allysa Cruz

Age: 19

Gender: Female

Location: Nasugbu Batangas

Occupation: Student

Background

Goals

She aims to easily browse and play music, switch between playlists quickly, and listen to relaxing music while studying or commuting..

Needs

She needs a simple and easy-to-use interface, clear song information, fast navigation between playlists, and a smooth overall user experience.

Pain Points

She struggles with confusing interfaces that have too many controls, difficulty finding playlists and recently played songs, and a lack of visual feedback when interacting with the app.

Listening Habits

She usually listens to music while studying, commuting, and relaxing. She prefers background music that helps her focus, and she frequently switches between playlists depending on her activity.

Preferences

Dark theme with green accent colour, split panel layout to see all sections at once, simple highlight to show active track, large central playback area, minimal clutter
